

- It is showing 82% twice, making the slider dynamic, showing the percentage instead of a separate purple box

- For confidence sliders, add 0 indicating not at all confident and 10 indicating highly confident
- Instead of 'finish' button after trial 33 and trial 66, add the 'next' button because participants can't know about jar switching

- Remove demographic questions about gender, year in college, and majors/minors. Only keep the open-ended question about strategy

We're almost there!

Before we end the study, please take a moment to answer the following questions

What strategy did you use to decide the probability of black balls in the jar?
Please describe in a few sentences how you made your probability estimates throughout the experiment.

Describe your strategy...

What is your gender?

☐ Male ☐ Female ☐ Non-Binary ☐ Prefer not to share

What year are you in of your college degree?

Select...

List your majors/minors

Major e.g. Psychology

Minor e.g. Computer Science
